I strongly support the Kennebunkport Warning to the American people concerning the next steps of the Cheney cabal. I think a year before the end of the Bush/Cheney-term we live in a very dangerous phase of history, because these people could try to postpone their resignation by means of terror and coup d'etat. The tools are all in place and the only thing they need would be a large and well-timed terror event in the States or abroad. There is only a narrow timeframe to impeach these people and I call on my friends in the United States to use it.

The Irish 9/11 Truth Movement hereby wholeheartedly endorses the Kennebunkport Warning of August 24/25. There is no doubt that we are currently at a global precipice in political as well as economic terms. The coming weeks and months are crucial if we are to sustain "for, by and of the people." Tyranny, like hell, is not easily conquered; yet we have this consolation with us - we will have done all we could.

Of course I support it.

...

Anyone who believes that the war criminals and sadists (Neo-cons, major political parties, military-industrial corporations, big oil, and Anglo-American-Israeli secret services) are going quietly leave power or ever leave Iraq are quite deluded. Like Hitler, they must have war after war to maintain terror and power. The novel "1984" is a most chilling example of life imitating art as the powers-that-be rewrite the history, put on a charade at opposing each other, and eternally pursue the terrorists they created. Moreover, capitalism is again showing its true nature as the economic house of cards that Greenspan created collapses. Please support the Kennebunkport Warning so that everyone knows that the coming terrorist and Iran attacks are fabricated by the power elite, not ignorant tribesmen in caves in Afghanistan. Prepare for the terrorist attack, martial law, and economic depression that is upon us.
